PROFESSIONAL SUMMARY

Final-year B.Tech Computer Science student with hands-on experience in software development through internships and projects. Skilled in Java, Python, SQL, REST APIs, PostgreSQL, and AI integration, with a strong foundation in Data Structures and Algorithms, Object-Oriented Programming, and database development with a focus on building practical and scalable software solutions.

EDUCATION

Mody University of Science and Technology, Lakshmangarh, Rajasthan

| Aug 2023 – May 2027

Bachelor of Technology in Computer Science — CGPA: 8.04/10

EXPERIENCE

Associate Software Developer – Intern — Acord Engineering

| Jun 2026 – Aug 2026

- Developed and integrated responsive frontend components for internal web applications using React.js.
- Built and consumed REST APIs using Node.js and Express.js for application data and CRUD operations.
- Worked with SQL database queries to retrieve, update, and manage application records.
- Debugged frontend/API issues, API testing using Postman, and used Git/GitHub for version control and collaborative development.

PROJECTS

AI Placement Mentor — Full-Stack AI Web Application

Live Demo: ai-placementmentor.vercel.app

| Feb 2026 – Apr 2026

Tech Stack: Next.js, Node.js, Express.js, PostgreSQL, Prisma ORM, Gemini AI

- Built an AI-powered placement platform generating personalized roadmaps, ATS resume feedback, and interview preparation guidance from student profiles and resumes.
- Implemented secure authentication, AI integration, REST APIs, database operations, and scalable backend architecture for the full-stack application.
- Developed **10+ integrated modules** enabling personalized evaluation across **8+ placement parameters**, delivering an end-to-end AI-driven placement preparation workflow.

ModiMap — Campus Navigation Web Application

| Jul 2025 – Oct 2025

Tech Stack: Python, Flask, HTML, CSS, JavaScript, OpenStreetMap

- Built a web-based campus navigation platform that helps students, faculty, and visitors locate campus buildings and facilities through an interactive digital map.
- Integrated **OpenStreetMap APIs** to enable interactive map-based navigation and route visualization, with a responsive Flask-based web interface.
- Designed a scalable architecture supporting **50+ campus locations** through a centralized navigation platform.

TREKKA — ML-Based Travel Recommendation System

| Jan 2025 – Mar 2025

Tech Stack: Python, Flask, Machine Learning, Content-Based Filtering, Cosine Similarity

- Built an ML-based travel recommendation system that generates personalized destination recommendations using content-based filtering and cosine similarity.
- Implemented data preprocessing, feature engineering, and similarity computation to generate personalized travel recommendations through a Flask-based web application.
- Developed a recommendation pipeline integrating **5+ processing stages**, from preprocessing to personalized recommendation generation.

SKILLS

Programming Languages: Java, Python, SQL

Core Computer Science: Data Structures & Algorithms, Object-Oriented Programming

Coursework: DBMS, Computer Networks

Developer Tools: VS Code, IntelliJ IDEA, IDLE, Postman

EXTRA-CURRICULAR ACTIVITIES

- **Technical Team Coordinator – Enginium:** Coordinated the technical team and published **2 technical articles** in the university's annual magazine.
- **Event Anchor** – Hosted the Alumni Meet and Farewell Ceremony at Mody University, engaging large audiences and managing stage proceedings.
- Former Member, BIS Drama Society

CERTIFICATIONS

- Alison - AI in Cybersecurity: Vulnerability, Intelligence, Security, and Ethics
- NPTEL - Internet of Things (IoT)
- Infosys Springboard - Python Programming
- Infosys Springboard - C Programming
